

Scales Air Compressor Corp.

Release date: October 11, 2005

Scales Air Compressor Corporation Changes Name, Adopts New Logo *New Name and Look Reflect Company's Broader Line of Services*

Carle Place, New York - October 11, 2005 - Scales Air Compressor Corporation, a leading provider of air compressor equipment, parts, service, maintenance, and energy management systems, has changed its name to Scales Industrial Technologies, Inc. The new company name and logo, effective September 30th, signals the 40-year old business' shift toward a broader offering of services to its diverse industrial customer base in the Northeastern and Mid-Atlantic regions of the country.

According to company founder and CEO, Bill Scales, the company has evolved since he and his brother Peter established the business in 1966. "We began our corporate life as a small air compressor repair shop, focused only on doing repairs for industrial customers, and doing them well," Scales says. "Times have changed, and the business has certainly kept pace, offering everything from preventative maintenance to turn-key installations to ongoing service and support. Our mission isn't just repairs anymore; it's about maximizing a plant's production capability, reducing its operating costs, and exceeding customers' expectations in the process."

As an example, Scales cites the company's designation by the U.S. Department of Energy as an "Allied Partner" based on its work in performing energy management system assessments throughout the world, with the goal of reducing energy costs on multiple compressor and cooling-water systems. With facilities for warehousing, repair and remanufacturing located across five states (Connecticut, New York, New Jersey, Pennsylvania and Massachusetts), Scales Industrial Technologies provides customers with a full spectrum of expert services:

- Repairs of air compressors and dryers from all manufacturers
- Process Gas Compressor Service and Repair
- Process Cooling Water Systems
- Turn-key system installations
- Emergency field service
- Machining services
- Upgrades for older equipment including VSD
- Complete systems analysis and troubleshooting
- Scheduled preventative maintenance agreements
- Energy management assessments

Scales Industrial Technologies offers a full line of Industrial Equipment including, Air Compressors, Compressed Air Treatment Equipment, Process Gas Compressors and Boosters, Medical Air Compressor and Vacuum Systems, Industrial Vacuum Systems, Closed Loop Cooling Systems, and Chillers from major manufacturers.

About Scales Industrial Technologies

Scales Industrial Technologies is a long-time leader in compressed air products and related equipment and services. Founded in 1966, Scales has evolved into an innovator in the industry. With 170 dedicated employees, over 100,000 square feet of working and warehouse space, and a fleet of more than 80 service vehicles, Scales provides a full range of services to customers nationally and internationally. Scales Industrial Technologies is now an employee-owned company (ESOP) continuing its long term view of meeting the changing and expanding needs of industry with a motivated and customer-focused workforce.
